

What is Monster Scout:

Monster Scout, created by Monomyth Studio, is a simple and fun iOS game designed to calm children's bedtime worries. It quickly scans an area to determine if creatures are hiding under beds or in closets. And if monsters are found, Monster Scout removes them! Monster Scout is designed to help kids conquer their fears, granting them (and their parents) a peaceful night's sleep.

With a bright, clean interface and friendly monster illustrations, Monster Scout is the best bedtime companion app for kids and adults. It will rapidly become kids' new favorite game!

Why we created Monster Scout:

We created Monster Scout as a response to the age-old childhood fear of things that go bump in the night. Our intent was to introduce a fun way to face and alleviate children's worries. By putting a friendlier face on the creatures in the dark, we put control back in their hands.

We hope to expand the features offered in this app.

About the Monster Scout creators:

Monster Scout was created, illustrated and designed by Monomyth, a Phoenix-based design and interactive studio. Monomyth creates and transforms brands into marketplace heroes. They're like Merlin to your Arthur.
